

## iQ-Gift Card

### **REWARD YOUR LOYAL GUESTS AND ATTRACT NEW BUSINESS WITH YOUR OWN BRANDED GIFT CARDS.**

Whether you create a custom-designed gift card, or you use just your hotel or business logo, a gift card from your hotel helps present a professional image.

iQ-Gift Card, fully integrated solution with roomMaster and iQ-Point of Sale, you have a cost effective way to promote your business that's better and more affordable than most.

Whether you are a single property, have multiple sales outlets, or are part of a chain or brand, you can configure iQ-Gift Cards to be accepted at one, some, or all of your locations.

Unlike most systems in which the purchase price of the gift card is held by the card processor until the card is redeemed, iQ-GiftCard is free of transaction fees and when you sell a gift card the money stays with you!

#### With the InnQuest Gift Card System

- There are no terminal fees or equipment you need to buy!
- You can process Gift Cards on any computer using roomMaster or iQ-POS
- It's your money! All deposits on gift cards remain with you.
- Your Gift Cards can be used across your chain or brand, allowing customers to load a card at property A and use it at property B.
- All merchants can setup their own expirations and escheatment laws with an administrator at InnQuest Software, such as having the system automatically expire cards after being loaded or last used.
